

Polynucleotide (PN) SKIN BOOSTER

ABOUT PN

The core ingredient PN, is a substance that has been highly concentrated from PDRN. Due to this, its average molecular weight is approximately three times higher than that of PDRN. Additionally, the length of PN is longer than that of PDRN.

As a result of having a larger average molecular weight and longer length, PN is expected to have better effects and stay in the body for a longer period of time compared to PDRN.

PN is effective to improve skin texture, reduce the appearance of fine lines and wrinkles, and enhance wound healing.

These blocks are known to work by stimulating the production of various growth factors in the skin, leading to increased cell turnover, improved blood circulation, and enhanced wound healing.

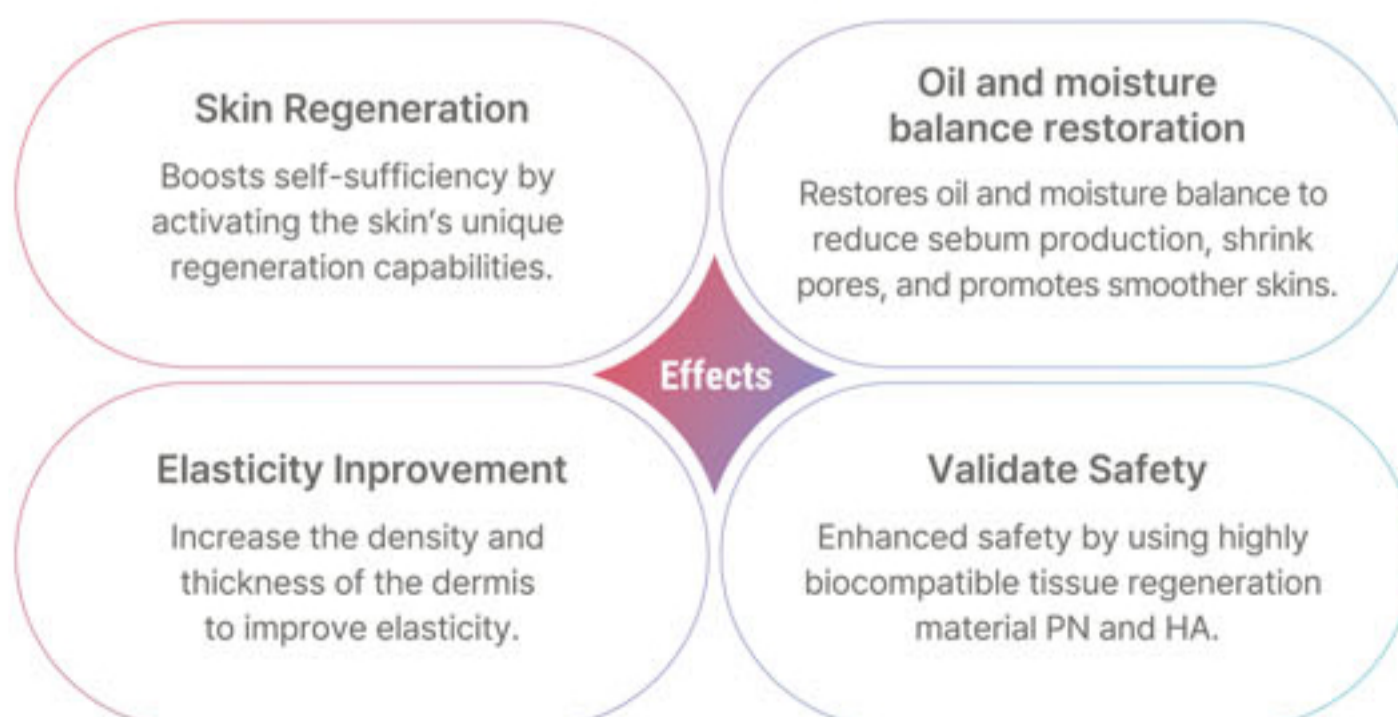

BENEFITS

- Anti-inflammation
- Stimulates growth factor and fibroblasts
- Regenerates collagen and elastin

FEEL THE REJUVENATION WITH **REJUBEAU PN SKIN BOOSTER**

A revolutionary skincare solution that delivers intense hydration and nourishment to the skin, promoting a more radiant and youthful appearance.

Skin Regeneration

Boosts self-sufficiency by activating the skin's unique regeneration capabilities.

Oil and moisture balance restoration

Restores oil and moisture balance to reduce sebum production, shrink pores, and promotes smoother skins.

Effects

Elasticity Improvement

Increase the density and thickness of the dermis to improve elasticity.

Validate Safety

Enhanced safety by using highly biocompatible tissue regeneration material PN and HA.

EYE DEAL

2.5 ml x 1 Syringe

Active ingredients

1% Polynucleotide(PN), 0.5% Sodium Hyaluronate(HA), Glutathione, Collagen peptides, Mannitol

Purpose

Dark Spot Care, Healing, Hydration, Improves elasticity, Boosts collagen production

Procedure Area

Face, Under Eyes, Dark Spot, Thin wrinkles, Neck line, Back of the hands

PN HEALER

2.5 ml x 1 Syringe

Active ingredients

2% Polynucleotide (PN)

Purpose

Super Healing, Skin barrier, Pore tightening, improves elasticity, Boosts collagen production

Procedure Area

Face, Deep wrinkles, Scars, Dryness in the skin

AQUA BOMB

2.5 ml x 5 Syringes

Active ingredients

1% Sodium Hyaluronate(HA), 0.5% Polynucleotide(PN), Glutathione, Collagen peptides, Adenosine, Palmitoyl Tripeptide-5,4,7, Acetyl Hexapeptide-8

Purpose

Super Hydration, Healing, Improves elasticity, Boosts collagen production

Procedure Area

Face, Under Eyes, Thin wrinkles, Neck line, Back of the hands

SILKY-Formula Technology

1. Ultra-high purity PN usage

By using directly manufactured high purity PN, we have minimized skin irritation and significantly reduced discomfort during injection. This is because the higher purity of the raw material reduces the risk of side effects caused by impurities and helps to suppress pain.

2. Optimized osmotic pressure & concentration

Optimized osmotic pressure and concentration tailored for human subcutaneous injection.

3. Viscosity control to minimize pain

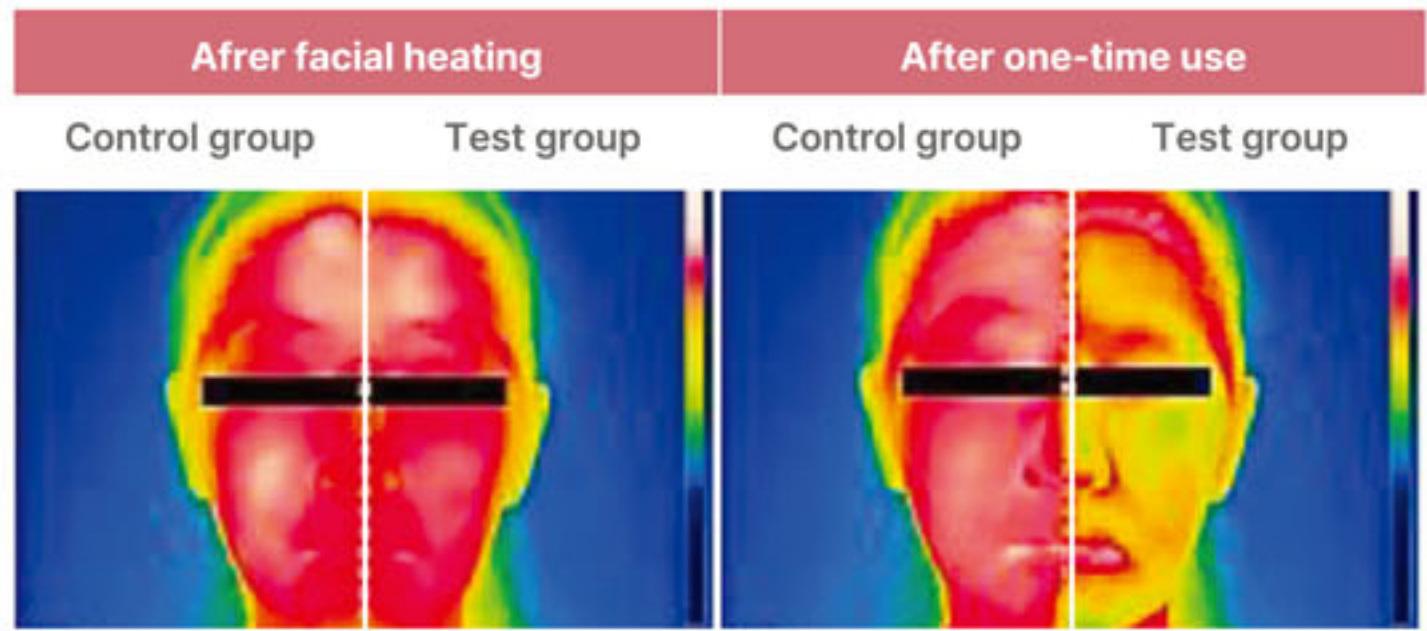

Through viscosity control, we have finely tuned the physical properties of the product.

This allows for minimized pain during injection while maintaining the effectiveness of the skin booster. As a result, customers can enjoy the best results while experiencing significantly reduced pain during the procedure.

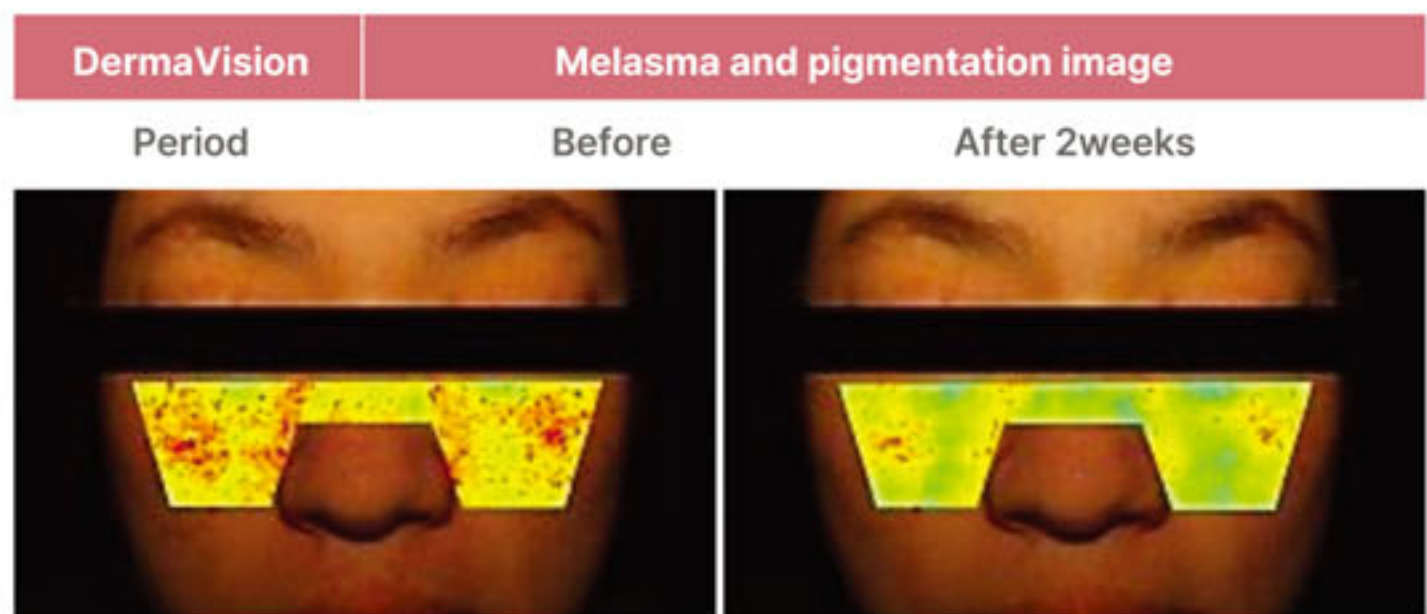

REJUBEAU Skin Booster is not just a beauty treatment, it's a next generation PN Skin booster that also considers customer comfort.

TEST REPORT

→ Skin instant cooling: **-5%**

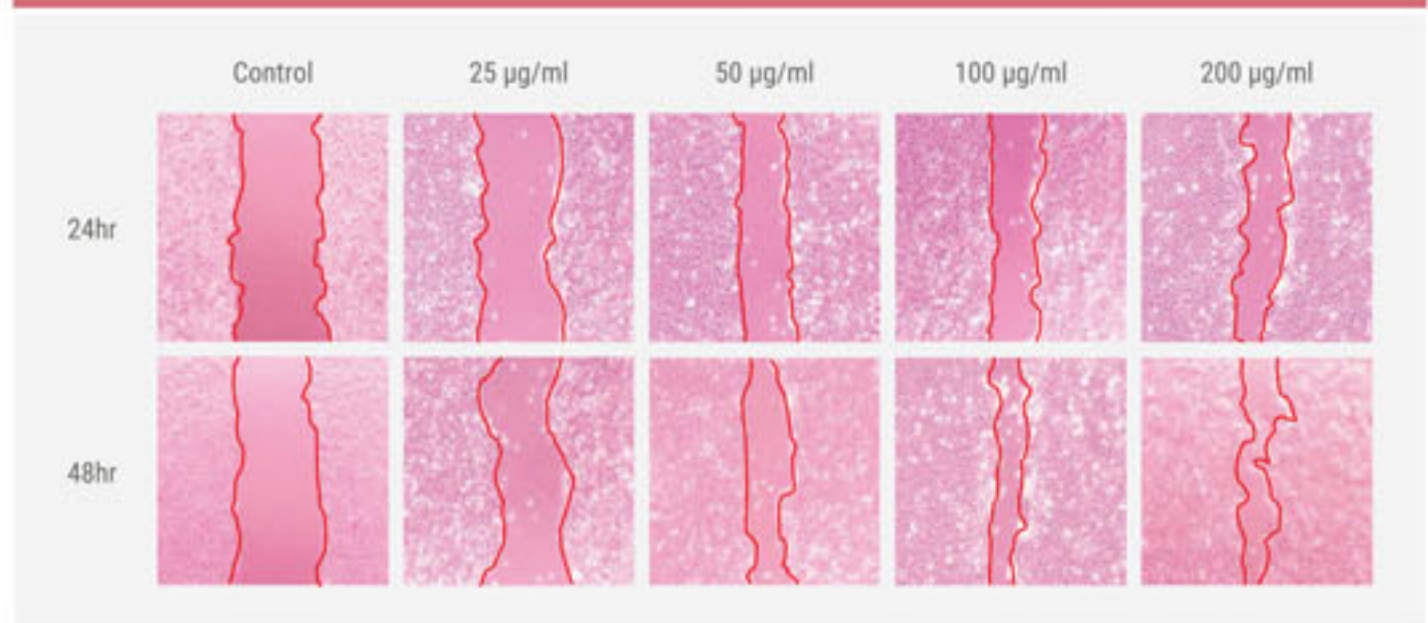

→ Melasma and skin coloration: Max. **37%** Improvement

→ Deep eye wrinkle and elasticaty: Max. **25%** Improvement

The effectiveness of cell regeneration

The data below shows cell recovery with PDRN in damaged skin cells.

→ REJUBEAU PN confirmed that skin cell regeneration was promoted.

Intracellular toxicity test

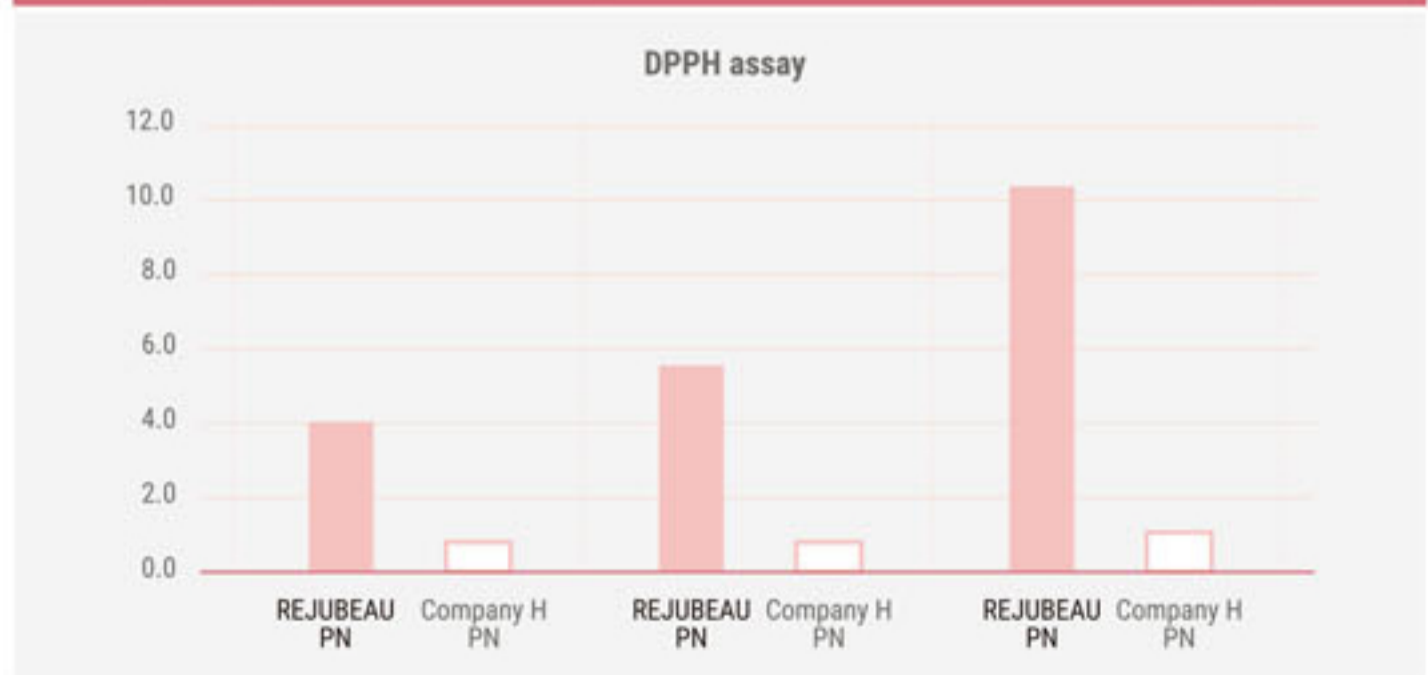

It is a test to determine if PDRN is toxic in cells.

→ Toxicity in cells did not appear at the maximum concentration used.

DPPH assay

Comparing antioxidant activity of REJUBEAU PN with other company's PN

→ REJUBEAU PN has a better antioxidant effect than Company H's PN.

HOW TO FILL REJUBEAU SKIN BOOSTER

The dermis is a vital layer of skin responsible for elasticity and regeneration, densely populated with fibroblasts and blood vessels. For optimal results, skin booster injections should be administered into the dermal layer, where they can directly interact with the fibroblasts and blood vessels, promoting collagen production, skin rejuvenation, and overall skin health.

Needle	Injection Degree
33G 4mm	25°

REJUBEAU PN SKIN BOOSTER
BEFORE & AFTER

Reliable Quality of REJUBEU PN

Polynucleotide (PN) - A to Z Manufacturer

Our manufacturer directly farms rainbow trout in Pyeongchang, Republic of Korea,
a clean area, and only company in Korea that has unified.

[trot male fertilization - farming - DNA extraction - manufacturing of finished products].

Our manufacturer's unique male fertilization production know-how and high-purity extraction
method enable customized production for each purpose.
